COLLET CHUCKS

ITC make Collet Chucks provide rigid and precise clamping for your CNC Turning requirements. All functional parts are made out of high-quality alloy steel, hardened and precision ground on high-quality CNC Grinding Machines.

The adaptor plate can be manufactured to suit the spindle configuration of your machine.

Spare collets can also be provided on a short notice in various sizes.

We provide a complete range of workholding solutions. For custom designed solutions, please contact us with complete details regarding workpiece, machine and loading.
